United States Patent [19]

Nakama et al.

[11] **Patent Number: 4,945,504**

[45] **Date of Patent: Jul. 31, 1990**

[54] **INSTRUCTION INPUT SYSTEM FOR ELECTRONIC PROCESSOR**

[75] Inventors: **Masato Nakama; Norihiro Hidaka,** both of Tokyo, Japan

[73] Assignee: **Casio Computer Co., Ltd.,** Tokyo, Japan

[21] Appl. No.: **40,489**

[22] Filed: **Apr. 20, 1987**

[30] **Foreign Application Priority Data**

Apr. 30, 1986 [JP] Japan 61-97843

[51] **Int. Cl.**[5] **G06F 1/00**

[57] **ABSTRACT**

An instruction input system for an electronic processor is capable of determining the type of an instruction and an area in which the instruction is to be executed simultaneously, in accordance with a set of touch-operation positions input via an input device having a touch-operation surface (coordinate input surface), thereby significantly improving the operability, input speed, and the like of the processor, and also improving the user interface.
