United States Patent [19]

Grinder

[11] **Patent Number: 4,473,910**

[45] **Date of Patent: Oct. 2, 1984**

[54] **INTRAOCULAR LENS**

[75] Inventor: **William H. Grinder**, San Francisco, Calif.

[73] Assignee: **Minnesota Mining and Manufacturing Company**, St. Paul, Minn.

[21] Appl. No.: **489,778**

[22] Filed: **Jun. 2, 1983**

Related U.S. Application Data

[63] Continuation of Ser. No. 312,272, Oct. 16, 1981, abandoned, which is a continuation of Ser. No. 113,682, Jan. 21, 1980, abandoned.

[57] **ABSTRACT**

An intraocular lens for positioning in the posterior chamber of the eye having a plastic lens body supported by first and second resilient spring-like support loops extending from opposite sides of the peripheral edge of the lens body; in use the support loop is preferably resiliently compressed against the equatorial region of the lens capsule of the eye from which the natural lens has been removed.
