(57) **ABSTRACT**

According to various embodiments, an apparatus is provided, including: a first display and a second display and a control circuit operatively coupled to the first display and the second display. The control unit is configured to perform operations including determining a relative position between the first display and the second display, and displaying information for presenting to a user via at least one of the first display or the second display, based on the relative position. Other embodiments are possible.
