US005693442A

United States Patent [19]

Weiss et al.

[11] Patent Number: 5,693,442

[45] Date of Patent: Dec. 2, 1997

[54] **CHARGE GENERATING ELEMENTS HAVING MODIFIED SPECTRAL SENSITIVITY**

[75] Inventors: **David Steven Weiss**, Rochester; **Wayne Thomas Ferrar**, Fairport; **Jane Robin Cowdery-Corvan**, Webster; **John Anthony Sinicropi**; **Marie B. O'Regan**, both of Rochester, all of N.Y.

[73] Assignee: **Eastman Kodak Company**, Rochester, N.Y.

[21] Appl. No.: **667,901**

[22] Filed: **Jun. 20, 1996**

[51] **Int. Cl.**[6] **G03G 5/147**

[52] **U.S. Cl.** **430/66**; 430/67

[58] **Field of Search** 430/66, 67

[57] **ABSTRACT**

A charge generating element having an electrically conductive layer, a charge generating layer overlying the electrically conductive layer, and an overcoat overlying the charge generating layer. The overcoat includes dye and a complex of inorganic oxide polymer and a charge carrier. The overcoat has a surface resistivity of from about 1×10^{10} to about 1×10^{17} ohms/sq.
