US005888549A

United States Patent [19]

Buchholz et al.

[11] **Patent Number: 5,888,549**

[45] **Date of Patent: *Mar. 30, 1999**

[54] **COFFEE AND PROCESS FOR THE PRODUCTION THEREOF**

[75] Inventors: **Klaus Buchholz**, Hamburg; **Claus F. Gosswein**, Buchholz; **Michael Ball**, Halstenbek; **Peter Hubert**, Buxtehude; **Reiner Kopsch**, Schenefeld; **Henning Lutz**, Halstenbek, all of Germany

[73] Assignee: **Code Kaffee-Handelsges, mbH**, Germany

[*] Notice: The portion of the term of this patent subsequent to Apr. 12, 2006, has been disclaimed.

[21] Appl. No.: **79,353**

[22] Filed: **Jun. 21, 1993**

Related U.S. Application Data

[63] Continuation of Ser. No. 827,572, Jan. 29, 1992, abandoned, which is a continuation of Ser. No. 123,852, Apr. 19, 1989, abandoned.

[57] **ABSTRACT**

Roasted coffee with an increased chlorogenic acid content of more than 2.8% by weight or instant coffee powder with an increased chlorogenic acid content of more than 8.5% by weight have a better compatibility. The increased chlorogenic acid content is achieved either by adding chlorogenic acid or by extracting raw coffee and adding the optionally concentrated extract to the roasted coffee.
