(57) **ABSTRACT**

A method of, and a system capable of, replaying a portion of a video comprising the steps of, and the means for receiving, during a playing of a video, a replay request to replay a portion of a video, the replay request comprising a voice command; storing a request position of the playing of the video responsive to the replay request; skipping, responsive to the replay request, the video to a replay position that is responsive to a preestablished replay preference amount adjusted by segment information subject to an override range; enabling a playing of supplementary information; playing the video and the supplementary information from the replay position; and discontinuing the playing of supplementary information responsive to the request position responsive to a preestablished replay preference amount adjusted by segment information subject to an override range. The supplementary information including, for example, subtitles, substitution of the audio language, different camera angles, other textual, video, and/or audio information that may supplement, complement, the information being played, and/or substitute, the audio dialogue and/or segment of a video; and/or any information which may be utilized to elucidate, illuminate, illustrate, clarify, and/or explain, during a replay, a portion of a video.
