[73] Assignee: Bausch & Lomb Incorporated, Rochester, N.Y.

[21] Appl. No.: 736,908

[57] ABSTRACT

[22] Filed: Oct. 29, 1976

An artificial intraocular lens system is provided with posterior and anterior tabs adapted to receive and hold a pin substantially perpendicularly therebetween. Said lens system allows for the insertion and affixing of the lens in the eye without the use of sutures and without requiring incisions in the iris to be made by the surgeon. Also disclosed is a tool for insertion of a lens system into the eye.
