[57] **ABSTRACT**

Apparatus for teaching reading comprises a book having lines of printed text and recordings of the text on associated magnetic strips and a pick-up member of sufficient weight to rest securely on the magnetic strips is provided with a tension member by which the pick-up member may be drawn manually or by a spring motor along the magnetic strips. The pick-up member may be shaped in a manner designed to appeal to the imagination of a user, for example as an animal.
