"Mirror with Built-in Display", U.S. Appl. No. 10/507,730, filed Apr. 14, 2005.

Primary Examiner—Lee Fineman

(57) **ABSTRACT**

A mirror device which can be simultaneously used for display purposes, based on e.g. an LCD display with a polarizing mirror placed in front of it. The polarizing mirror has the characteristics that it does not disturb the transmission of the light from the display, but does reflect the light from outside the area of the screen. The polarizing mirror is embedded in a conventional mirror.
