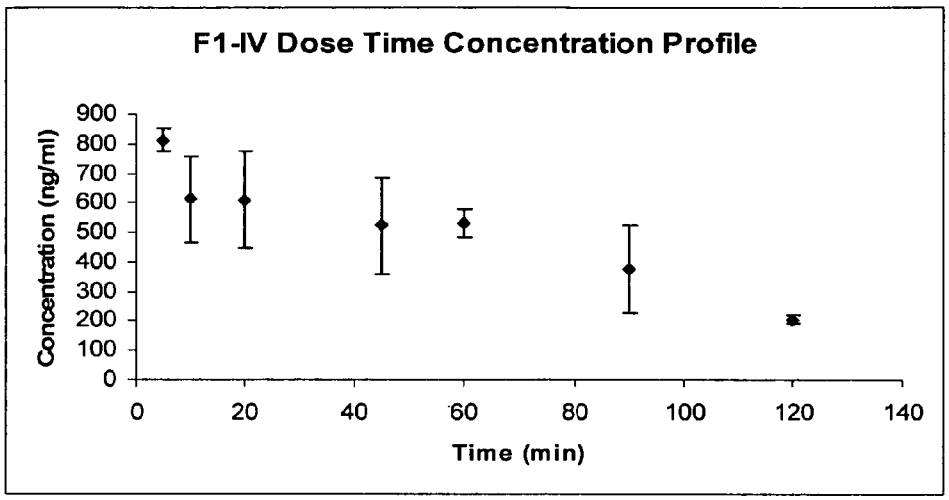
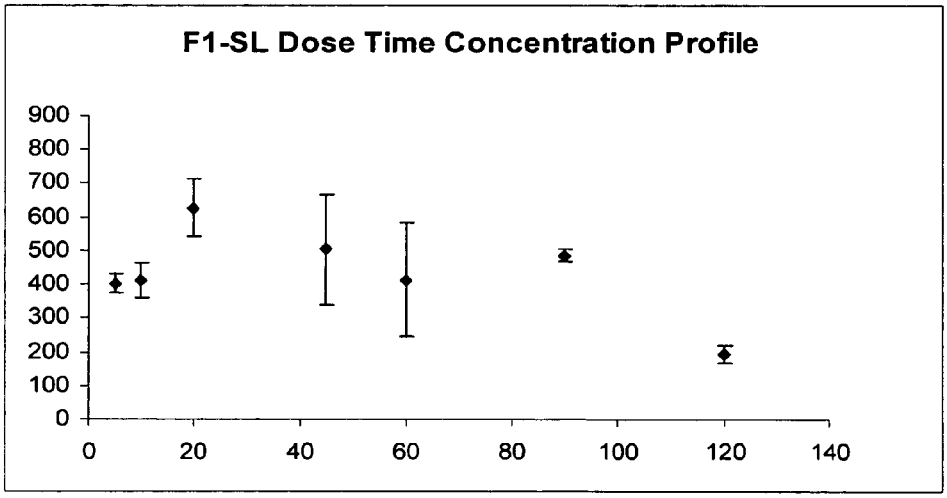
Plasma concentration-time curves after IV & SL doses of Fentanyl

Figure 1: Formula of Example 1, 50 μg IV dose



Mean (±S.E.) plasma concentration–time profiles following intravenous administration of Fentanyl (n=3).

Figure 2: Formula of Example 1, 50 μg Sublingual dose



Mean (±S.E.) plasma concentration–time profiles following sublingual administration of Fentanyl (n=3)
