(57) **ABSTRACT**

A clip-on golfing club holster allows a golfer to hold a golf club at the golfer's side after use. The holster directs the shaft of the club out of the way of the golfer so that, for example, when the golfer uses a wedge to get on the green, the golfer may holster the wedge and move to putting while keeping the wedge close at hand. The holster includes a clip to attach the club to a golfer's belt and a head cover designed so that the golf club hosel hangs behind the golfer and out of the way. With the weight of the golf club head supported by the holster, there may not be any discomfort with carrying the club in the holster.
