

a solubility of from about 0.1 grams to about 100 grams per 100 grams of water.

62. A process according to claim 61, wherein said pesticide is selected from the group consisting of tetramethyl-O,O'-thiodi-p-phenylene phosphorothioate, tributyltin fluoride, and tributyltin oxide.

63. A process according to claim 62, wherein the melt flow index of said ethylene-vinyl acetate copolymer ranges from about 6 to about 12 and the melt flow index of said ethylene-propylene copolymer ranges from about 15 to about 45, wherein said ethylene-vinyl ac-

tate copolymer has a molecular weight of from about 75,000 to about 300,000, and wherein said ethylene-propylene copolymer has a molecular weight of from about 100,000 to about 200,000.

64. A process according to claim 63, wherein said anchor weighs from about 2 to about 10 times the total weight of said floating dispenser.

65. A process according to claim 64, wherein said floating dispenser has a plurality of strands.
