(57) **ABSTRACT**

A multifunctional riding vehicle includes a steering assembly having a joint. A frame has a main body including an end thereof pivotally connecting to the joint between different fixed positions, and has a platform adapted to be extended and collapsed. The multifunctional riding vehicle has a first configuration in which the main body of the frame is in a first of the fixed positions and the platform is in an extended position, and a second configuration in which the main body of the frame is in a second of the fixed positions and in an upside-down relationship with respect to the first fixed position and the platform is in a collapsed position.
