A timepiece includes an exterior case having a protruding section, a case back, a dial receiving ring, a dial, a dial ring, and a casing ring disposed around the outer circumference of the dial receiving ring. The casing ring includes a casing-ring-side contact section that comes into contact with the inner circumferential surface of the exterior case, a front-surface-side contact section that comes into contact with the protruding section, a casing ring spring section that is formed to be elastically deformable in the thickness direction of the timepiece and comes into contact with the case back, and a support section that protrudes from the inner circumferential surface of the casing ring.
