[57] **ABSTRACT**

Apr. 4, 1990 [EP] European Pat. Off. 90107992.1

A pharmaceutical composition for topical application is described on the basis of a W/O emulsion, which contains piroxicam in the oil phase as an active ingredient. On account of its good compatibility to the skin and stability characteristics, the composition is very suitable for use as an antirheumatic, antiphlogistic and/or anti-inflammatory pharmaceutical.
