[21] Appl. No.: 666,335

[57] ABSTRACT

[22] Filed: Oct. 30, 1984

An intraocular lens which may be inserted into the eye through an incision in the cornea which is substantially less than 5 mm in length. The lens includes a lens body which comprises a plurality of lens body portions and magnet means for assembly of the lens body portions within the eye after they are individually inserted through the incision.
