(57) **ABSTRACT**

The present invention provides an intraorally rapidly disintegrating tablet that can be formed using an ordinary apparatus, that has hardness with no practical problem and that disintegrates rapidly with good feeling in the oral cavity. The present invention is intraorally rapidly disintegrating tablet produced by compression molding of a granule coated with a disintegrant, in which the granule contains a disintegrant also inside thereof and a drug except ambroxol hydrochloride inside and/or outside thereof.
