(57) **ABSTRACT**

A novel maize variety designated PH23YW and seed, plants and plant parts thereof. Methods for producing a maize plant that comprise crossing maize variety PH23YW with another maize plant. Methods for producing a maize plant containing in its genetic material one or more traits introgressed into PH23YW through backcross conversion and/or transformation, and to the maize seed, plant and plant part produced thereby. Hybrid maize seed, plant or plant part produced by crossing the variety PH23YW or a locus conversion of PH23YW with another maize variety.
