(57) **ABSTRACT**

A system and method is provided that facilitates the administration of an application in accordance with the present invention. The system includes a resource identifier that identifies resources associated with the application and a manifest that logs the resources. An aggregator is provided that aggregates a subset of the resources into the manifest to facilitate administration of the application. The aggregator can be provided by a user interface and/or an automated builder. A graphical user interface is also provided to facilitate deployment, creation and enumeration of the application.
