

13**EXAMPLE 37**

	Parts
Methocel (MC type 15 cps. grade)	70
Decaglycerol tristearate	1
Cottonseed oil	29

This was emulsified and homogenized at 5% solids and then spray dried.

EXAMPLE 38

Example 11 was repeated replacing decaglycerol tristerate with triglycerol monostearate and replacing decaglycerol decaesterate with decaglycerol monostearate. The coffee whitener obtained was even more superior than Example 11.

We claim:

1. A composition in which volatiles are prevented from going off consisting essentially of a spray dried emulsion of (1) a polyglycerol partial ester of a higher fatty acid, (2) a carbohydrate selected from the group consisting of water soluble starch, modified starch other than water soluble starch, dextrin, sucrose, glucose, maltose, lactose, gum arabic, larch gum and corn syrups having a D.E. value of at least 4, and (3) an essential oil.

2. A composition according to claim 1 wherein the carbohydrate is gum arabic.

14

3. A composition according to claim 2 containing 19.5 parts essential oil, 0.5 part decaglycerol tristearate and 80 parts gum arabic.

4. A composition according to claim 1 wherein the ingredients are employed in amounts sufficient that volatiles are prevented from going off and the product is granular.

5. A composition according to claim 1 wherein the carbohydrate is gum arabic and the composition contains 19.5 parts essential oil, 0.5 part decaglycerol monostearate and 80 parts gum arabic.
