

3

drogen sulfate, nitrate, fumarate, lactate, tartrate, or methane sulfonate and at least 5 mg/ml of a hydroxylamine salt which is hydrochloride, hydrobromide, sulfate, phosphate, or nitrate.

2. A stable solution according to claim 1 wherein the hydroxylamine salt is the hydrochloride.

3. A stable solution according to claim 2 wherein the pralidoxime salt is the chloride.

4. A stable solution according to claim 3 wherein the concentration of the hydroxylamine hydrochloride is 5 to 15 mg/ml.

4

5. A composition according to claim 4 consisting of water, hydroxylamine hydrochloride, and pralidoxime chloride.

6. A stable aqueous solution according to claim 4 wherein the pH is not over 4.0.

7. A stable aqueous solution according to claim 1 wherein the pH is not over 4.0.

8. A stable aqueous solution according to claim 1 wherein the pH is 1.4 to 4.0.

9. A stable aqueous solution according to claim 1 wherein the pH is 3.0 to 4.0.

10. A stable aqueous solution according to claim 1 wherein the pralidoxime salt is the methanesulfonate.
