[57] **ABSTRACT**

An anti-aging preparation for cutaneous application which prevents cutaneous aging, a collagen cross-linking inhibitory preparation for cutaneous application which inhibits collagen cross-linking occurring predominantly in the dermis to maintain skin elasticity and to prevent wrinkles or sagging, and an anti-UV preparation for cutaneous application which protects the skin from harmful effects caused by of excessive exposure to ultraviolet rays of sunlight are disclosed. The preparation contains one or two aminoethyl compounds represented by formula (I):

wherein X represents —SO₂H or —SO₂SH, and preferably contains at least one ultraviolet protective agent.
