(57) **ABSTRACT**

A firearm enhanced trigger control connector. A torso has a guide angle positioned at a first predetermined angle. The guide angle contains a trigger bar of a firearm. The torso further has a first connector leg extending therefrom at a second predetermined angle. The first connector leg has a disconnecter tab at a third predetermined angle. Extending from the first connector leg is a control tab. The torso further has a second connector leg that removably fits within a trigger housing of the firearm.
