(57) **ABSTRACT**

One customizable utility rod assembly includes a wall attachment member; a base rod; and a cross rod, hook, towel ring, shelving rod, or toilet paper rod extending from the base rod. The wall attachment member has threading and at least one hole. The base rod has a distal side and a threaded proximal side threadably coupling the base rod to the wall attachment member. A method of customizing a utility rod having: (a) a threaded wall attachment member with a hole, and (b) a base rod presenting a distal side and a threaded proximal side forming a cavity, includes the following steps. Step (1): securing the wall attachment member to a surface with a fastener extending through the hole. Step (2): threadably coupling the base rod proximal side to the wall attachment member such that the wall attachment member is at least partially enclosed within the cavity.
