(57) **CLAIM**

The ornamental design for a biomedical data recorder chassis, as shown and described.

DESCRIPTION

The U.S. Government has a paid-up license in this invention and the right in limited circumstances to require the patent owner to license others on reasonable terms as provided for by the terms of contract No. TPD-99-C-30009 awarded by the U.S. Department of Treasury.

FIG. 1 is a perspective view of the biomedical data recorder chassis according to the present invention.

FIG. 2 is a front view of the biomedical data recorder chassis according to the present invention.

FIG. 3 is a right side of the biomedical data recorder chassis according to the present invention.

FIG. 4 is a left side view of the biomedical data recorder chassis according to the present invention.

FIG. 5 is a rear view of the biomedical data recorder chassis according to the present invention.

FIG. 6 is a top view of the biomedical data recorder chassis according to the present invention; and,

FIG. 7 is a bottom view of the biomedical data recorder chassis according to the present invention.

The broken line illustration in the figures relates to environmental structure and is not part of the design sought to be patented.
