(57) **ABSTRACT**

A decorative engineered self-hem and a method to prepare the decorative engineered self-hem in a single fabric is disclosed herein. It is prepared without having any additional cut and sew, with various weave patterns designed in a design area 10-20 inches from a selvedge area and the rest of the fabric is woven in conventional weave pattern such as satin/twill. The method of preparation includes cutting the fabric parallel to a selvedge area; folding the fabric overlapping the selvedge area; and folding the full fabric horizontally and, at the same time, hemming of edge of the selvedge area to finish.
