

OTHER PUBLICATIONS

- Creep Behavior and Structural Characterization at High Temperatures of Nicalon SiC Fibers; *J. Mat. Sci.* 19, 1984, pp. 3658–3670; G. Simon, et al. (No. Month).
- Thermal Stability of SiC Fibers (NICALON); *J. Mat. Sci.* 19, 1984, pp. 1191–1201; T. Mah, et al. (No Month).
- Brazing of Pressureless-Sintered SiC Using Ag–Cu–Ti Alloy; pp. 2431–2434; Jonal Kofi Boadi, et al. (No Date).
- Joining of Dense Silicon Carbide by Hot Pressing; *J. Mat. Sci.* 15, 1980, pp. 1049–1051.
- Ti₃SiC₂ Phase in SiC/SiC Joint Brazed with Cu₄₃Ti₅₇ Alloy; pp. 1417–1418; T. Nishino, et al.
- Development of a Toughened SiC Bond Material for Joining of Continuous Fiber Ceramic Composites; Presented at CESP/CFCC Joining Workshop, Chicago, Illinois, Sep. 20, 1995, I.E. Anderson, et al.
- Joining of Non-Oxide Ceramics for High Temperature Applications; *Ceramic Bulletin*, 69, 3 (1990); Bates et al.
- Bonding Mechanism Between Silicon Carbide and Thin Foils of Reactive Metal; *J. of Materials Science*, 20, (1985), Morozumi et al.
- Feasibility Study of the Welding of SiC; *J. Am. Ceramic Soc.*, 68 (6), C-151–153, (1985), Moore.
- Effects of Joining Pressure and Deformation on the Strength and Microstructure of Diffusion Bonded Silicon Carbide; *J. Am. Ceramic Soc.*, 75 (3), (1992).
- “High Temperature Bonding of Silicon Carbide”; Masters Thesis, New Mexico Inst. of Mining and Technology, Aug. 8, 1989; Gehris.
