(57) **ABSTRACT**

According to an embodiment, there is provided a fishing rod with which a fishing line guide that has a leg portion extending in an extension direction of the fishing rod main body can be mounted on a fishing rod main body in a simple manner. The fishing rod includes a rod-shaped fishing rod main body, a fishing line guide including a leg portion arranged on an outer surface of the fishing rod main body and extending along an extension direction of the fishing rod main body, and a tubular fixing member formed of fiber-reinforced plastic, covering the outer surface of the fishing rod main body and the leg portion, and pressing the leg portion toward the outer surface.
