[51] Int. Cl.⁷ **A47G 21/18; B05B 12/14**

An assemblage for drinking a plurality of potable and/or medicinal liquids simultaneously from discrete receptacles while prevent contamination of one liquid by another. The assemblage comprises a plurality of conduits joined together that convey isolated streams of the liquids from separate receptacles into the mouth. Preferably, the conduits are mechanically deformable along their axes of elongation. The conduits are joined by a catch, by binding, by molding the conduits as a single unit, or by raveling. At least one conduit includes a check valve.
