(57) **ABSTRACT**

A fishing line guide includes a pair of lateral support legs and one rear support leg which extend from a guide ring. When viewing the fishing line guide from front, an outer contour of the lateral support legs is inclined from an attachment foot thereof at an angle of 45 degrees or more with respect to a horizontal line passing the attachment foot. An outer contour of the guide ring has a curve line, which has a center located outside the outer contour of the guide ring, from a position located at 45 degrees below the center of the guide ring. An upper contour of the lateral support legs joins to the outer contour of the guide ring above the center of the guide ring. A lower contour of the lateral support legs joins to the outer contour of the guide ring below the center of the guide ring.
