**EX PARTE
REEXAMINATION CERTIFICATE
ISSUED UNDER 35 U.S.C. 307**

THE PATENT IS HEREBY AMENDED AS
INDICATED BELOW.

Matter enclosed in heavy brackets [] appeared in the patent, but has been deleted and is no longer a part of the patent; matter printed in italics indicates additions made to the patent.

AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

Claims 1-3, 5-9 and 11-14 are cancelled.

Claims 4 and 10 are determined to be patentable as amended.

4. [The enteral composition of claim 3] *A flavored enteral composition for a metabolically stressed patient comprising a protein source providing about 15% to about 20% of the energy of the composition, the protein source consisting essentially of partially hydrolysed whey protein, and wherein said protein source is the sole protein source of the composition;*

2

a carbohydrate source; and

a lipid source including a mixture of medium and long chain triglycerides; the composition having an energy density of about 1.5 kcal/ml, a ratio of non-protein calories per gram of nitrogen of at least about 90:1, and an osmolality of 500 to 700 mOsm/kg water;

wherein the lipid source provides about 20% to 50% of the energy of the composition.

10. [The enteral composition of claim 1] *A flavored enteral composition designed for metabolically stressed patients comprising:*

a protein source consisting essentially of whey and providing about 15% to about 20% of the energy of the composition, and wherein said protein source is the sole protein source of the composition;

a carbohydrate source;

a lipid source including a mixture of medium and long chain triglycerides, the enteral composition having a caloric density of at least about 1.4 kcal/ml and an osmolality of 500 to 700 mOsm/kg water;

wherein the lipid source provides about 20% to 50% of the energy of the composition.
